## EDUCATION

|                                                                                                                                  |                                                |
|----------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------|
| <b>University of California, Berkeley</b><br>Ph.D. in Computer Science<br>Advisor: Prof. Henry Corrigan-Gibbs                    | Incoming Fall 2026<br>California, USA          |
| <b>Seoul National University</b><br>B.S. in Computer Science & Mathematics<br>Advisor: Prof. Yongsoo Song & Prof. Jung Hee Cheon | Mar 2022 – Aug 2026 (expected)<br>Seoul, Korea |

## RESEARCH INTERESTS

I am interested in cryptography and aspire to contribute to a more secure world. My interests include private information retrieval, fully homomorphic encryption, and lattice-based cryptography.

## PUBLICATIONS

Authors listed in alphabetical order by last name.

- Efficient Full Domain Functional Bootstrapping from Recursive LUT Decomposition**  
Intak Hwang, [Shinwon Lee](#), Seonhong Min, Yongsoo Song  
SAC 2025  
Honorable Mention — Korea National Cryptography Contest 2025 (\$1,500 prize)

## EXPERIENCES

|                                                                                                                                                                                            |                                            |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|
| <b>SNU Crypto &amp; Privacy Lab</b><br><i>Undergraduate Researcher</i><br>· Advisor: Prof. Yongsoo Song                                                                                    | Oct 2024 – Dec 2025<br><i>Seoul, Korea</i> |
| <b>CryptoLab Inc.</b><br><i>Research Intern</i><br>· Internship focused on optimizing Fully Homomorphic Encryption performance.<br>· Advisor: Prof. Guillaume Hanrot & Prof. Damien Stehlé | Jun 2024 – Aug 2024<br><i>Lyon, France</i> |
| <b>SNU Cryptography Lab</b><br><i>Undergraduate Researcher</i><br>· Advisor: Prof. Jung Hee Cheon                                                                                          | Jan 2024 – Aug 2024<br><i>Seoul, Korea</i> |

## TEACHING

|                                                                                                                      |                        |
|----------------------------------------------------------------------------------------------------------------------|------------------------|
| <b>Seoul National University (Teaching Assistant)</b><br>· Computer Architecture (English lecture)<br>· Logic Design | Fall 2025<br>Fall 2024 |
|----------------------------------------------------------------------------------------------------------------------|------------------------|

## TALKS

|                                                                                                                                               |          |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Efficient Full Domain Functional Bootstrapping from Recursive LUT Decomposition</b><br>· SAC 2025, Toronto Metropolitan University, Canada | Aug 2025 |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----------|

## SKILLS & ADDITIONAL INFORMATION

---

**Programming:** C/C++, Python, Go, Java

**Tools:** Git, Linux, LaTeX, Pytorch

**Languages:** Korean (native), English (fluent)

**Other:** South Korean Citizen, U.S. Permanent Resident
